APPENDICES – QUANTITATIVE TEMPLATES DISCLOSURES	26

The Board of BNP Paribas Cardif Livförsäkring AB (the "Company") herewith presents the Solvency and Financial Condition Report for the financial year 2022.

Special note for the 2022 report:

The COVID-19 pandemic and the war in Ukraine have contributed to a rise in inflation globally and in the Nordics. Energy prices have increased to very high levels where the rapid price hike affects the purchasing power of the households negatively. These events have affected the global supply chain as well as demand for goods and services and therefore had a significant impact on the global growth. As a result, the central banks in the area have increased their rates in a rapid pace and are projected to continue with increases throughout the year.

This new macro-economic situation has affected the level of new business as well as the volume of claims observed and the valuation of financial assets.

Summary

The Company supplies Creditor Protection and Payment Protection Insurance as well as individual life insurance policies in the Nordic markets and distributes its products mainly through banks, finance companies, insurance companies and card companies.

The Company has distribution branch offices in Denmark and Norway, and operates through freedom of services in Finland.

In 2022, the Company's gross written premiums amounted to 296 047 KSEK (234 295 KSEK in 2021).

The result for the year after taxes amounts to 8 603 KSEK (7 484 K SEK in 2021). The Company is continuing to invest in new partnerships that will generate future income.

In 2022, the macro-economic environment has changed significantly and affected negatively the global demand of goods and services. Some consequences of these changes are a lower demand of credit and creditor protection insurance.

The assets under management amount to 142 287 KSEK as of 31 December 2022 (2021: 146 673 KSEK). Income from asset management amounted to -5 304 KSEK in 2022 (-496 KSEK in 2021).

The Solvency position of the Company shows a coverage ratio of 243% as at December 31st (192% as at December 31st 2021) of the SCR, in excess of the target of 185%. The coverage ratio is increasing compared to 2021 due to an increase of the available own funds by 26%.

This Solvency and Financial Condition Report is produced in accordance with the Solvency II Directive. It covers the business and performance of the Company, its system of governance, risk profile, valuation for solvency purposes and capital management. The ultimate responsibility for all of these matters lies on the Company's Board of Directors, with the help of various governance and control functions that it has put in place to monitor and manage the business of the Company.

A. Business and Performance

A.1 Business

The Company is a limited liability insurance company, with company registration number: 516406-0559. The Company is under the supervision of Finansinspektionen, Box 7821, 103 97 Stockholm, Sweden.

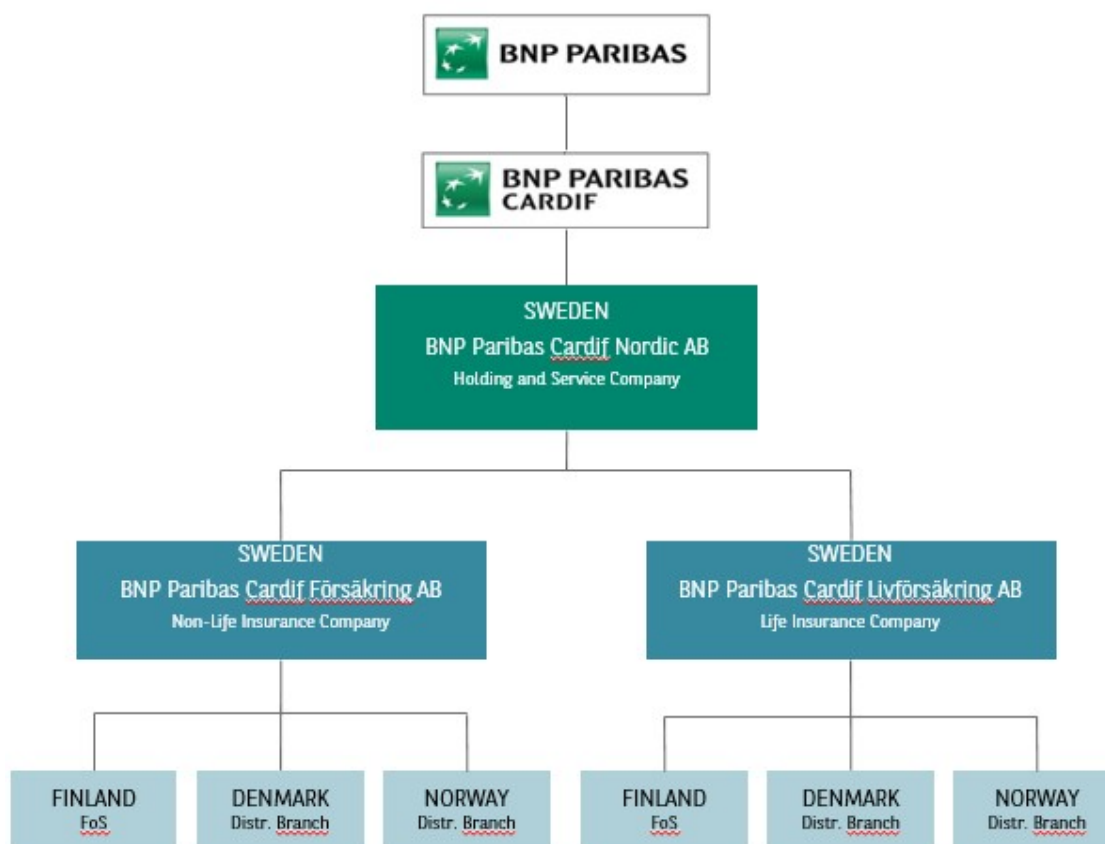

The Company's external auditor is Deloitte AB, 113 79 Stockholm. Responsible for the audit: Emelie Lorentzson Lindholm.

The Company is a subsidiary of BNP Paribas Cardif Nordic AB, which in turn is wholly owned by BNP Paribas Cardif SA, which is the insurance subsidiary of the French banking group BNP Paribas. Mother company of the group is the French bank BNP Paribas S.A. (corp. ID No: 662 042 449) with registered office in Paris. BNP Paribas Cardif SA is under the supervision (group supervision) of the French supervisory authority ACPR.

BNP Paribas Cardif Nordic AB is the mother company of two insurance entities: BNP Paribas Cardif Försäkring AB and BNP Paribas Cardif Livförsäkring AB. These three companies are organized around a common Nordic platform, where employees have an employment contract with either BNP Paribas Cardif Nordic AB or BNP Paribas Cardif Försäkring AB. There are outsourcing agreements between the consolidated companies within the Nordic group.

The key entrepreneurial risk taking function (KERT) is now performed only in Sweden. With this follows that since January 1st 2021, the branches in Norway and Denmark have become commercial branches and that all insurance result are booked in the Swedish entity while the branches are remunerated for their services to sell and market our insurance products. This change allows the centralizing and simplifying of the administration of the Company.

See below corporate organization chart.

BNP Paribas

BNP Paribas is a European leader in global banking and financial services. The Group has around 190 000 employees and operates in more than 65 countries, of which four are considered domestic markets (France, Belgium, Italy and Luxembourg).

BNP Paribas Cardif

BNP Paribas Cardif is the insurance subsidiary of BNP Paribas. The primary business model is bank assurance which means that BNP Paribas Cardif supplies protection and savings solutions to end clients via the distribution networks of actors such as banks and finance companies (B2B2C model). The bank assurance business model was introduced in France in 1973, which means that today BNP Paribas Cardif has over 40 years of experience of the concept.

In total, BNP Paribas Cardif has around 500 partners, amongst which are leading banks, finance companies, insurance companies, card companies, retailers, utilities and broker networks.

BNP Paribas Cardif has subsidiaries in 33 countries in Europe, Asia, Latin America and Africa and has about 100 million policy-holders and 8 000 employees.

The Company's business and result

The Company supplies Creditor Protection and Payment Protection Insurance as well as individual life insurance policies in the Nordic markets and distributes its products mainly through banks, finance companies, insurance companies and card companies.

The Company has distribution branch offices in Denmark and Norway, and operates through freedom of services in Finland.

In 2022, the Company including its branches had gross written premiums amounting to 296 047 KSEK (234 295 KSEK in 2021).

The result for the year after taxes amounts to 8 603 KSEK (2021: 7 484 K SEK).

The assets under management amount to 142 287 KSEK as of 31 December 2022 (2021: 146 673 KSEK). Income from asset management amounted to -5 304 KSEK in 2022 (-496 KSEK in 2021).

A.2 Underwriting Performance

Underwriting income

Evolution of the technical NBI country

K SEK

Country	Technical NBI net of reinsurance 2022	Technical NBI net of reinsurance 2021	Evolution
Denmark	3 744	3 741	0%
Finland	1 026	2 703	-62%
Norway	2 190	2 683	-18%
Sweden	76 088	70 852	7%
Total	83 048	79 979	4%

- The technical NBI is the net banking income in the group terminology of profit and loss accounts. It represents the income from insurance activities after claims but before overheads.

Profit & Loss 2022/2021

<i>Profit and loss account (KSEK)</i>	2022	2021
Technical account, life assurance business		
Premiums written, net of reinsurance	279,584	220,589
<i>Premiums written</i>	<i>296,047</i>	<i>234,295</i>
Claims incurred, net of reinsurance	- 78,558	- 57,367
Change in other technical provisions, net of reinsurance	- 2,908	3,339
Bonuses and rebates, net of reinsurance	- 15,358	- 6,427
Allocated investment return transferred to the non-technical account	2,939	375
Subtotal for life assurance business	11,531	9,134
Profit or loss for the financial year	8,603	7,484

- The majority of the business is coming from the Line of Business "Other Life Insurance".
- Over 90% of the technical result for Life is concentrated in Sweden.
- Due to its relatively small size, the portfolio is volatile.
- The overall level of claims and reserves has increased during 2022, therefore the technical NBI has increased at a lower pace compared to the growth of volumes.
- Expenses have increased from 151 MSEK in 2021 to 169 MSEK in 2022.

A.3 Investment Performance

The investment portfolio comprises corporate bonds, covered mortgage bonds of high credit quality, government bonds, municipality securities, supranational bonds and cash. The total portfolio was valued at 142 287 KSEK as of 31 December 2022 (2021: 146 673 KSEK) out of which 45% in Swedish covered mortgage bonds, 29% in Swedish corporate bonds, 17% in Norwegian government bonds, 5% in Swedish municipality securities, 3% in supranational bonds and marginal holdings in cash (SEK and NOK).

In KSEK

Assets under management	Total Market Value	Weight	Modified Duration	Total Return
Norwegian government bonds	23 694	16,7%	0,29	0,07%
Supranational bonds	4 771	3,4%	2,51	-0,26%
Swedish government bonds	-	-	-	-
Swedish municipality securities	6 912	4,9%	0,66	-0,08%
Covered mortgage bonds	64 358	45,2%	2,96	-2,93%
Corporate bonds	41 505	29,1%	0,54	-0,30%
Cash	1 048	0,7%	-	-
Total	142 287	100,0%	1,66	-3,50%

These investments are held to cover technical provisions of the Company for linked liabilities.

Total net investment return for the year is -5 304 KSEK (2021: -496 KSEK) which comprises interest earned on financial investments of 963 KSEK (2021: 821 KSEK), realized gain on bonds of -259 KSEK (2021: 70 KSEK), and unrealized result of -6 008 KSEK (2021: -1 387 KSEK). This return corresponds to a performance of -3.50% for the Company's portfolio in 2022.

A.4 Performance of other activities

The Company does not have any other activities that are significant.

A.5 Any other information

Factors related to the pandemic and the Russian war in Ukraine have contributed to a rise in inflation globally and in the Nordics. Recently, energy prices have increased to very high levels where the rapid price hike affects the purchasing power of the households negatively. As a result, the central banks in the area have increased their rates in a rapid pace and are projected to continue with increases throughout the year.

Overall, economic activity will dampen due to the higher energy prices and decrease of households' purchasing power. A higher interest rate will overall affect households negatively but will at the same time increase the monthly costs for credits.

The current macro-economic environment is affecting the activity of BNP Paribas Cardif in 2022 but it does not result in any revision or any concern regarding the solvency position.

B. System of Governance

B.1 General information on the system of governance

Board and Management

BNP Paribas Cardif Livförsäkring's Board consists of four members: Marc Weibel, chairman of the board, Åsa Blessner (who is Managing Director of BNP Paribas Cardif Nordic AB), Marieke van Zuien and Gaelle Baetz.

The Board meets at least six times per year to determine the company's strategic direction, to review the Company's operating and financial performance and to oversee that the Company is adequately resourced and effectively controlled.

The Managing Director, Philippe Pinsonnat, is responsible for implementing the decisions of the Board. To assist with this, there is a Management Committee and an Executive Committee, see more below under Management and Risk Management Committees.

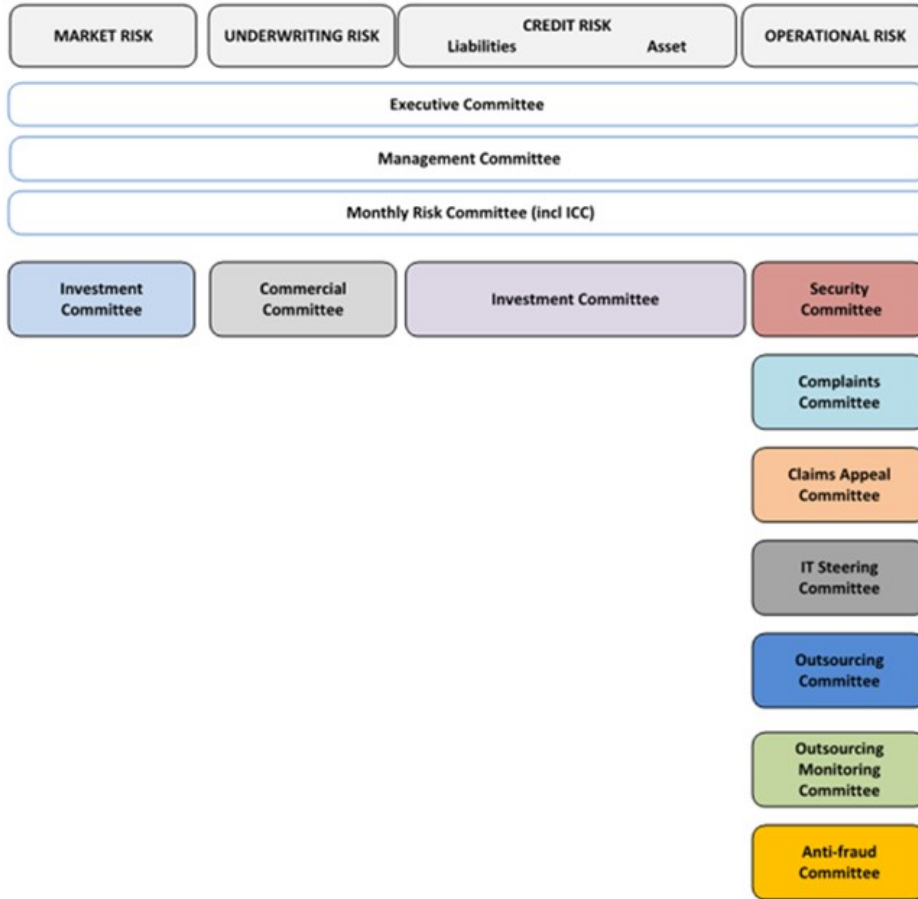

General Managers for the Norwegian and Danish distribution branches

Tore Ustad is the branch manager in Norway and Finn Berg is the branch manager in Denmark.

Management and Risk Management Committees

The Company has a number of management and risk management committees for certain key processes, as illustrated below:

Risk Management Committees

Key Functions

The *Risk Management Function* (Permanent Control) assists the Board of Directors and other functions in implementing the risk management system, and to ensure that monitoring and control is setup to support management in governance and decisions. It reports on exposures to risks and assists the Board of Directors in the taking of strategic decisions by shedding light on issues related to risk management. The Risk Management Function is also responsible for the ORSA.

The *Compliance Function* has the responsibility to provide the Managing Director and the Board of Directors with reasonable assurance that the risks of non-compliance, the risks of regulatory and reputation are duly monitored, controlled and mitigated.

The *Internal Audit Function* is responsible for assessing the suitability and effectiveness of the internal control system as well as the other components of governance.

The *Actuarial Function* has responsibility for coordinating the calculation of technical reserves, guaranteeing the appropriate nature of methodologies, the underlying models and assumptions used to calculate prudential technical reserves, assessing the suitability and the quality of the data used, supervising this calculation and comparing the best estimates with empirical observations. From 2017, the Actuarial Function has been outsourced and therefore separated from the manager of the actuarial department.

Remuneration Policy

No remuneration is given to the board members for the board assignments.

The Board annually adopts a remuneration policy applicable to all staff. The Board is also responsible to ensure a well-defined remuneration assessment process. For this purpose there is a Compensation Committee appointed to be in charge of the preparation of the decisions and appropriate documentation of the policy implementation and follow up. This Compensation Committee consists of the Chairman of the Board, Head of HR and the Managing Directors. The compensations are finally approved at Head Office level.

The remuneration policy complies with the applicable regulations (Article 275 of Commission Delegated Regulation 2015/35 and FFFS 2015:12).

The Company should strive for a sound and reasonable balance between fixed and variable remuneration. The decision on the variable part, should consider the following parameters:

- Amount and costs of extra capital needed to cover for the added risk taken on.
- Amount and cost of the liquidity risk, and
- Risk of expected future income not being realized.

The variable part should include benefits. No threshold should prevent it to be nil. The variable part should never exceed 50% of the fixed salary.

It is important to secure that the individual performance targets stated in an individual contract does not conflict with the long-term financial well-being of the Company.

For employees that can influence the risk level within the Company, deferred payment of variable remuneration shall be applicable (the Company shall defer a substantial portion (at least 60%) of the total bonus for a period of at least three years).

Shares/Options

During the years 2005-2012, the staff in the Company was, at six different occasions, offered to participate in a Discounted Share Purchase Plan (DSPP) in a global employee shareholders fund holding shares in BNP Paribas SA. This is not an offered possibility anymore.

Pensions

The Company has no supplementary pension or early retirement schemes for the members of the Board or the holders of key functions.

Material transactions with shareholder, members of board or management

Not applicable.

B.2 Fit and proper requirements

The Company has adopted a Fit and Proper Policy, which sets out the specific requirements and describes the process for assessing the fitness and the propriety of the persons who effectively run the undertaking or other key functions.

There is also requirements to do Fit and Proper assessments, and provide continuous education of employees working with insurance distribution and/or financial security.

The Fit and Proper assessment process can be described in three steps:

- 1) Assessment of fitness (competence, skills, knowledge, education, capability, reputation, integrity and legal capacity),

2) Assessment of propriety (financial soundness, honesty, integrity and reputation) and,

3) Potential conflicts of interest shall also be taken into consideration.

Assessment of fitness

Board Members, the Board of Directors' collective qualifications, Managing Director and Branch Manager

The members of the Board, the Managing Director and Branch Manager shall possess appropriate education, qualification, experience and knowledge about at least:

- a) insurance and financial markets
- b) business strategy and business model
- c) system of governance
- d) financial and actuarial analysis and,
- e) regulatory framework and requirements for the authorized business (including insurance mediation/distribution).

Some more areas have been evaluated as important such as knowledge about the analysis of customer value and protection and banking business.

The members of the Board, the Board of Directors' collective qualifications, the Managing Director and the branch manager have been notified to and approved by the Swedish FSA.

Persons responsible for outsourced key functions

If applicable, a person should be appointed within the Company with an overall responsibility for an outsourced key function who is fit and proper and possesses sufficient knowledge and experience regarding the outsourced key function to be able to challenge the performance and results of the service provider. The assessment criteria for the fit and proper assessment of the responsible for an outsourced key function should be based on the assessment criteria for the relevant outsourced function, but considering that the responsible person will not perform the tasks, but oversee them.

The responsible persons for outsourced key functions have been notified to and approved by the Swedish FSA.

Responsible for the actuarial function (outsourced)

The responsible for the actuarial function shall fulfill the specific requirements set out in SFS regulation FFFS 2015:8, Chapter 9, Section 9-15 having adequate language skills, compliance with the minimum education and professional experience. The responsible person shall continuously ensure that his/hers knowledge is appropriate considering the tasks the person shall perform and the nature of the Company's business, and, if necessary, acquire further education.

Responsible for the other key functions (compliance, risk management, internal audit)

The responsible for compliance, risk management and internal audit functions shall have adequate language skills, compliance with the minimum education, relevant professional experience within the insurance sector, other financial sectors or other businesses, taking into account the respective duties allocated to that person and, where relevant, the insurance, financial, accounting, actuarial and management skills of the person. The responsible person shall continuously ensure that his/hers knowledge is appropriate considering the tasks the person shall perform and the nature of the Company's business, and, if necessary, acquire further education.

The responsible persons for key functions have been notified to and approved by the Swedish FSA.

Assessment of propriety

Assessment of propriety includes (depending of the assessed position):

- identification (civic register or copy of passport),
- certificate that the person is not bankrupt,
- certificate that the person is not subject to a trading prohibition,

- certificate that the person does not have a guardian,
- certificate that the person has not had a license or registration revoked during the past five years, or, been a member of the management of a legal person that has had a license or registration revoked,
- certificate that the person does not have debts which exceed SEK 100,000 and which are executed at the Swedish Enforcement Authority,
- extract from the criminal register.

Conflicts of Interest

Analysis of potential conflicts of interest shall be made, for instance if the assessed person has leading positions or ownership interests in several companies. In the recruitment process and annually there is a process for mapping and identifying conflicts of interest, in accordance with the Company's Policy for preventing and managing conflicts of interests.

B.3 Risk management system including the own risk and solvency assessment

- Risk Management System

The Board of Directors in the Company has overall responsibility for the establishment and oversight of the risk management framework. For the purpose of ensuring appropriate handling of each category of risk; a risk committee structure as well as a reporting structure has been put in place and adopted by the Board of Directors. Detailed mandates are defined and adopted by the Board of Directors, concerning the ability to take decisions on investments, as well as underwriting, and all other decisions that may affect the risk level of the Company.

In order to control the risk environment the Board has procedures and policies, and function descriptions detailing the roles and responsibilities of key functions.

The Company applies the standard formula and as such, the risks that the Company is exposed to during the lifetime of its insurance obligations are factored into the SCR calculation.

- Managing underwriting risk taking

The underwriting process (launching new insurance products, marketing existing products by new distribution networks or new populations, etc.) is centered on the knowledge of the risks taken, the evaluation of which is standardized by the technical analysis, which requires a review of all the risks of the product under consideration: technical, financial, credit, operational, compliance and business.

The underwriting process also reflects the application of the reinsurance policy.

- Management of market and credit risk taking

Governance covers all key asset management and risk monitoring processes, ensuring compliance with cross-functional requirements and a sound and prudent asset management. Governance covers the following elements:

- Investment policy describing the missions, responsibilities, operating procedures, procedures and controls of the asset management actors.
- Investment Committee to monitor the asset management.
- Investment rules.

Considering both the principles & specific processes of the Asset Management credit risk and the Insurance Activity credit risk, two governances exist on credit risk:

Both governances aim especially at assessing, mitigating and monitoring credit risk within the Group.

Investments are only made on bonds (both state and corporate with high stable ratings) which are the most secured and simple investments in the market; we benefit as well from the expertise of our external Asset Manager in charge of our portfolios.

The valuation of assets and liabilities under risk-neutral model.

- Management of operational risk taking

Operational risk is contingent on underwriting, market and credit risk taking. It also occurs when internal processes fail or when external events occur. This is why the taking of operational risk is approached from two angles:

- The assessment of operational risk when deciding on other risks (underwriting, market and credit) on the one hand,
- Regular assessment of the operational risks of organization and processes and ways to reduce them. This evaluation benefits from the incident reporting mechanism, implemented in the Company.

The risks of non-compliance and reputation are controlled by compliance with laws, regulations and professional ethics, by protecting the reputation of the Company, its investors and its customers, and by ethics in professional behavior of employees in the service of the Company.

The Risk Management function is responsible for monitoring the effectiveness of the risk management framework, as well as advising the business on risk management related matters, such as monitoring and control methods.

In addition, the internal audit regularly assesses the compliance with risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

ORSA process

The ORSA process, as defined in the ORSA policy adopted by the Board of Directors, has been defined as set out below.

The Monthly Risk Committee (including the Managing Directors) defined the stress scenarios to be used for the ORSA exercise. The scenarios are chosen based on the main risks of the organization and their estimated potential impact and probability.

The proposed stress scenarios are reviewed and challenged by the Board of Directors, and final adoption of scenario selection is made before the detailed calculations and analysis are initiated.

A cross functional group including the Monthly Risk Committee members and the Finance team defines a detailed planning for the production of the ORSA, with clear deadlines and gates (dependencies).

The calculations detailing the outcome of the stress tests and scenarios are carried out by the Finance and Actuarial departments. Inputs are given by other functions, primarily the Sales Department and Operations, to determine the impact on premium volumes and costs (including staffing). All calculations are subject to a four-eye validation process before being added to the final report.

A final draft report is presented to the Board of Directors for comments and input. It is also submitted for comments and opinion to the external actuarial function holder. The final ORSA, taking added input into account, is adopted by the Board of Directors before submission is made to the SFSA.

Assessment of solvency needs and integration of capital management and risk management

After each prudential closing and in relation to budget updates, a review of the capital planning may be necessary if result is showing a significant deviation from earlier prognosis.

The capital planning for the central scenario is performed during the yearly budget process in August and updated during the ORSA process where the following projections are made on the midterm business plan (three years):

- Forward looking assessment of the SCR, the SCR ORSA and the MCR in order to assess the corridor values.
- Forward looking assessment of the own funds taking into account the dividend policy.

The capital planning takes into account the outcome of the stress tests performed during the ORSA process to:

- enable a good understanding of the capacity to absorb unexpected shocks; and
- propose a review of the calibration of the lower boundaries defined for the own funds within this policy if this appears necessary.

This should determine if a call of additional capital is necessary to reach an adequate capital position by year end. The results are communicated to the Board of the Company and the Group Financial Management team.

B.4 Internal control system

The Board has the overall responsibility for maintaining the systems of internal control of the Company and for monitoring their effectiveness, while the implementation of internal control systems is the responsibility of the executive management, supported by the Risk management function. The Company's systems of internal control are designed to manage, rather than eliminate, the risk of failure to achieve business objectives, and can provide only reasonable, and not absolute, assurance against material financial misstatement or loss.

The systems are designed to:

- safeguard assets;
- maintain proper accounting records;
- provide reliable financial information;
- identify and manage risks;
- support the operations in being compliant and in mitigating and/or eliminating the compliance risks in Personal Data Protection (the area is monitored by the Data Protection Correspondent);
- maintain compliance with appropriate legislation and regulation; and
- identify and adopt best practices.

The Company has an established governance framework, the key features of which include:

- Risk Management Policy including Internal Control Guidelines,
- a well-defined structure of risk committees,
- a clear organizational structure,
- documented delegation of authority from the Board to executive management,
- policies and procedures, which set out risk management and control standards for the Company's operations.

There is an ongoing process for identifying, evaluating and managing the significant risks faced by the Company. The Company's risk management and control framework is designed to support the identification, assessment, monitoring, management and control of risks that are significant to the achievement of its business objectives. The Company has a set of formal policies that govern the management and control of both financial and non-financial risks.

Compliance Function

The Compliance function is directly subordinated to the Managing Director in the Company.

The purpose of the Compliance function may be summarized as the responsibility to support the operations in being compliant and in mitigating and/or eliminating the compliance risks in the following areas:

- Customer interest/protection
- Market integrity
- Financial Security (Prevention of Financing of terrorism including bribery and breach of financial sanctions).
- Regulatory systems and controls
- Professional Ethics
- Corporate Social Responsibility (the area is monitored by the HR department)
- Relations with Supervisory authorities

The Compliance function is responsible for monitoring and controlling the risk of non-compliance with regulations related to the licensed business, as well as professional standards and internal procedures and instructions. In addition, the function shall perform analysis of the possible impact of any change in the legal environment on the Company's operations and provide trainings on compliance topics.

The Compliance function is responsible for composing an annual activity plan based on the identified compliance areas. The Board of Directors adopts the activity plan.

The Compliance function shall at least annually, and/or when needed, submit a written summarized report including an analysis of the Company's compliance environment and present it to the Board of Directors. The Compliance function shall also annually and quarterly submit reports of its activities including an analysis to the Board of Directors and to the Managing Director of the Company.

B.5 Internal audit function

The Internal Audit consists of the combined use of Group Internal Audit "Inspection General", and an outsourced local Internal Audit Function.

The activities of the Inspection General are defined by the Internal Audit Policy of BNP Paribas Cardif Group.

The activities of the local Internal Audit are defined by the local Internal Audit policy as adopted by the Board of Directors of the Company. The policy is reviewed on an annual basis and subject to annual adoption. No significant changes were made to the Local Internal Audit Policy during 2022.

The Internal Auditors intervene independently throughout the auditable scope of the Company. They can seize any subject and have free access to all documents, assets and personnel working directly or indirectly for the Company. Similarly, they are free to issue their conclusions in full independence from the management of the insurance group. They must remain independent, objective and impartial in their investigations, and cannot directly undertake any operational management action.

The local Internal Audit Function performed audits according to the plan adopted by the Board of Directors.

Inspection General (IG):

In the group, the head of the internal audit function reports regularly to the Board of Directors of the BNP Paribas group (or to the dedicated committee that represents it) the results of the work of the function. For audits to be performed in the Nordics, it submits a proposal for an audit plan detailing the internal audit missions to be carried out. This audit plan is based on, among other things, an assessment of the risks borne by the various activities of the Group, and by ensuring that all material activities are periodically reviewed.

Local Internal Audit:

The Internal Audit function is outsourced to a local provider. Their task is to review, evaluate and report the activities of all operations, including the risk control and compliance functions. The local internal audit reports directly to the Board. The persons in charge of the Internal Audit are not responsible for any other key function, hence no such conflict of interest and/or appropriateness has to be considered.

B.6 Actuarial function

The Actuarial Function Holder (AFH) is outsourced to the company FCG. The responsibilities of the AFH are listed in an annual plan shared to the Board.

B.7 Outsourcing

The Company may, in accordance with the Outsourcing Policy adopted by the Board of Directors, outsource activities when the use of external providers shows obvious advantages in terms of costs and flexibility. Outsourcing may also be made when the required competence or systems are not available in-house. Outsourcing of important or critical activities or operational functions must not:

- materially impair the quality of the Company's system of governance;
- unduly increase the operational risk;
- impair the ability of the supervisory authorities to monitor the Company's compliance of its obligations; nor
- undermine continuous and satisfactory services to the Company's policy holders.

Outsourcing procedure

The Company has a specific outsourcing coordinator.

Any activity outsourced, defined as critical, shall be handled in accordance with the Outsourcing Policy. The decision to outsource should be formalized by a decision based on a risk assessment provided by all concerned functions (to cover the entire risk perspective).

There is a template agreement to be used for outsourcing agreements, safeguarding all the legal requirements for outsourcing of critical activities.

Monitoring and supervision

Each function that outsources an activity is responsible for monitoring the risks associated with each stage of outsourcing (as well as during the production phase, when the service has been implemented by the service provider). Each function is supported by the outsourcing coordinator. The result of this monitoring is presented to the management of the company at the Outsourcing Monitoring Committees that are held once per year. In addition, any follow up actions are followed up during a Monitoring Risk Committee.

All outsourced service provider contracts include a right for the Company and its supervisory authority to audit the activity if requested.

Outsourced critical functions/activities

The Company's distribution model is completely based on distribution by partners. Certain partners perform other tasks than pure intermediation of insurance, such as premium collection, keeping of insurance register, subscription of insurance policies etc. Such outsourcing constitutes more than half of the outsourced services. Such outsourced activities are carried out in all the markets where the Company operates, i.e. Sweden, Denmark, Finland and Norway.

Some activities are outsourced within the group, such as provision of IT platform. These services are performed by group companies in France.

Claims handling activity for Finland are performed by a specialized company in Finland.

A member of the Board is appointed responsible for the outsourced Local Internal Audit Function.

A member of the Board is appointed responsible for the outsourced Actuarial Function.

All outsourced critical activities have been duly notified to the SFSA.

B.8 Any other information

The Company has defined a governance system, with well-defined organization, steering documents and mandates that is found to be appropriate for the type and size of the business. The system is subject to regular review and update whenever required by change in regulation, environment or due to internal causes.

C. Risk Profile

The SCR (Solvency Capital Requirement) is the level of own funds that all European insurance companies are required under the Solvency II EU Directive to hold at each time, in order to be able to fulfil their obligations to their policy holders and beneficiaries over the following twelve months with a 99.5% probability.

The Company's SCR is evaluated by means of the standard formula proposed by EIOPA. It corresponds to the sum of the net BSCR (Basic SCR), of the operational SCR, and the tax adjustment. The BSCR is based on a bottom-up approach, in other words its calculation is divided into risk modules, themselves divided into sub-modules. The capital requirements for each of the various risks are aggregated by means of a correlation matrix.

The information presented in this chapter deals with the nature of the risks to which the Company may be exposed, the evaluation techniques used, the significant risk concentrations as well as the mitigation techniques set up, and the procedures for monitoring their effectiveness.

C.1 Underwriting risk

C.1.a Definition

Underwriting Risk is the risk of a financial loss caused by a sudden, unexpected increase in insurance claims. Depending on the type of insurance business (life, non-life), this risk may be statistical, macroeconomic or behavioral, or may be related to public health issues or disasters.

C.1.b Risk exposure

The breakdown of the SCR for underwriting risk into its risk-modules and the evolution from 2021 to 2022 is given in the following table.

K SEK

SCR Underwriting	2022	2021	Variation
Sub-modules Life	61 715	55 088	12%
Diversification	-17 268	-12 292	40%
Life underwriting risk	44 447	42 796	4%
Sub-modules Health	-	-	0%
Diversification	-	-	0%
Health Underwriting risk	-	-	0%
Sum of risk components	61 715	55 088	12%
Diversification	-	-	0%
Total SCR Underwriting	44 447	42 796	4%

The SCR underwriting risk for the Company is determined by the Life underwriting risk.

The main contributors to the Life underwriting risks are the life catastrophe risk and the life lapse risk.

C.1.c Risk management and monitoring

The mechanism for monitoring and managing the underwriting risk is based on governance and documented processes. Risks underwritten must comply with delegation limits set at several local and central levels based on estimated maximum acceptable losses, estimated Solvency 2 capital requirements, and estimated margins on the policies concerned. Each contract is priced in reference to the objectives for rate of return and return-on-own funds set by the Executive Management of BNP Paribas Cardif Group.

Underwriting risks are periodically monitored within the scope of the risk monitoring, based on a dual mechanism:

- Monthly monitoring dashboards;
- Monthly risk committee.

C.1.d Stress tests and analyses of sensitivity

At the time of pricing, approval of a product requires systematic analysis of negative (stress test) or very negative (crash tests) scenarios. The stress tests and crash tests are carried out over the same period as the baseline scenario.

Stress scenarios for the major risks identified by the management of the company are presented in the ORSA.

C.2 Market risk

C.2.a Definition

Market Risk is the risk of a financial loss arising from adverse movements of financial markets. These adverse movements are notably reflected in prices (foreign exchange rates, bond prices, equity and commodity prices, derivatives prices, real estate prices...) and derived from fluctuations in interest rates, credit spreads, volatility and correlation.

C.2.b Risk exposure

The Company invests majority of its assets on liquid or very liquid assets with high credit quality (see the table in the part A.3 Investment Performance).

The market risk SCR is 9 005 KSEK after diversification as of 31 December 2022, compared to 7 935 KSEK as of 31 December 2021.

The risk modules forming the market SCR are the following:

The **interest rate risk** module aims at quantifying the capital requirement needed to cope with the impact on the balance sheet value of an upward or downward change in the yield curve. The capital requirement is equal to the impact of the increase in the yield curve and the impact of the decrease in the yield curve. For each maturity, the shocks caused by the increase or decrease are expressed in proportion to the rates by duration.

The **spread risk** module aims to quantify the capital requirement corresponding to the risk of an upward trend in credit spreads (difference in actuarial rate between a bond and the rate of an equivalent risk-free government bond). The spread shock depends on the duration of the rating of the interest rate products. As with the interest rate risk, its evolution is linked to the composition of the bond portfolio.

The **currency risk** (foreign exchange rate risk) module aims to quantify the capital expense of a 25% impairment of foreign currencies against the SEK. The exposure of the Company stems on investments and cash denominated in foreign currencies (NOK, DKK and EUR).

The **concentration risk**: the governance of the Asset Management Division lays down the rules for the spread of assets. These rules are set out in the investment policy and guidelines and specify limits per issuer on fixed income instruments and rating category in order to keep a well-diversified portfolio.

The **diversification module** is materializing the correlation between the risk components. The impact of diversification effects did not vary much between 2021 and 2022.

C.3 Counterparty risk

C.3.a Definition

Counterparty Risk is the risk of loss or of adverse change in the financial situation, resulting from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which insurance and reinsurance undertakings are exposed, in the form of counterparty default risk, or spread risk, or market risk concentrations. Among the debtors, risks related to financial instruments and risks related to receivables generated by the underwriting activities (premium collection, reinsurance recovering...) are distinguished into two categories: "Asset Credit Risk" and "Liabilities Credit Risk".

C.3.b Risk exposure

The counterparty risk SCR was at SEK 0,8 million as at 31 December 2022 (SEK 1,1 million in 2021).

C.3.c Risk management and reduction

The counterparty risk on reinsurers is managed through a stringent selection of counterparties and regular monitoring of the main exposures.

Partner counterparty risk is assessed and monitored in the KYI (Know Your Intermediary) Process, at commencement of relationship and regularly. Ring-fenced accounts are normally set up for premiums collected by partners, as and when required under local regulations.

C.4 Liquidity risk

C.4.a Definition

Liquidity Risk is the risk of being unable to fulfil current or future foreseen or unforeseen cash requirements coming from insurance commitments to policyholders, because of an inability to sell assets in a timely manner at an acceptable cost without significantly impacting market prices.

C.4.b Risk management

The Company mitigates the liquidity risk in the following ways:

- The Company, through Investment Committee and regular cash follow-up, manages the liquidity risk through investments in predominately liquid financial assets and **continuous** monitoring of expected assets maturities regarding liabilities.

The Company prepares cash forecast regularly to predict required level of liquidity levels both for short-term and medium-term.

Note: there is no quantification for this risk. The risk is governed by the nature of our investments.

C.5 Operational risk

C.5.a Definition

Operational Risk is the risk of loss resulting from the inadequacy or failure of internal processes, IT failures or deliberate external events, whether accidental or natural. The external events mentioned in this definition include those of human or natural origin.

Internal processes are specifically those that involve employees and IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.

Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, risks related to the provision of inappropriate financial services (conduct risk), risk related to failures in operating processes including underwriting procedures; or the use of a model (model risk) along with any potential financial consequences resulting from the management of reputation risk.

C.5.b Risk exposures

The amount of the SCR linked to the operational risk was at SEK 11,9 million at 31 December 2022 (SEK 9,5 million at 31 December 2021).

C.5.c Risk management

To manage operational, non-compliance and reputational risk, the Company relies on its general internal control system, a twin-dimension system providing both periodic and permanent control.

The Company also monitors the operational risks through a dedicated Committee; Internal Control Committee, where major exposures and concerns are addressed, and mitigating actions are defined.

C.6 Other material risks

Any significant changes in taxes could impact the Company's resources and liquidity requirements.

C.7 Any other information

There is no other specific information.

D. Valuation for Solvency Purposes

D.1 Assets

The assets in the Company's balance sheet at 31 December 2022 are comprised as follows:

<i>In KSEK, at December 31, 2022</i>	<i>Reference</i>	Solvency 2 Balance sheet	Annual Financial report
Deferred acquisition costs	A	-	7 132
Other intangible assets	B	-	-
Deferred tax assets	C	-	-
Property held for own use	D	-	-
Investments (other than assets held for index-linked and unit-linked contracts)	E	141 239	141 239
Assets held for index-linked and unit-linked contracts		-	-
Reinsurance recoverables	F	2 275	4 912
Deposits to cedants		-	-
Insurance and intermediaries receivables	G	-	-
Reinsurance receivables	G	2 142	15
Receivables (trade, not insurance)		31 340	31 340
Cash and cash equivalents		16 883	16 883
Other assets		-	-
TOTAL ASSETS		193 879	201 521

Letters A to G refer to the assessment methods described below when considered as significant.

Reconciliation with the financial statements and method for evaluating assets:

<i>In KSEK</i>	<i>Reference</i>	December 31, 2022
Financial assets fair value	E	-
Goodwill and intangible assets fair value	A and F	-
Valuation of insurance recoverables under Solvency II and elimination of deferred acquisition costs	A, C and F	- 9 769
Revaluation of subordinated liabilities	C	-
Others	C	2 127
Assets and deferred tax liabilities compensation	C	-
TOTAL OF RESTATEMENTS		- 7 642

Pursuant to Article 75 a) of the Directive, assets are valued "at the amount for which they could be exchanged between knowledgeable and willing parties in an arms-length transaction".

A. Deferred expenses reported

The share not chargeable to the expenses incurred when purchasing insurance contracts is entered with assets in the Company's balance sheet. These acquisition expenses reported are eliminated under Solvency II.

C. Deferred tax assets

Deferred taxes are determined by the method described in paragraph D.5.a (Other information). Deferred tax assets are recognized for all deductible temporary differences and unused carry-forwards of tax losses only to the extent that the entity in question will in all probability generate future taxable profits against which these temporary differences and tax losses can be offset.

D. Equipment for own use

Equipment for own use are valued at their economic value, which is assumed to be consistent with a linear amortization over 5 years.

E. Financial investments

Financial assets are listed on the asset side of the balance sheet in accordance with the Complementary Identification Codes (CIC codes) determined by EIOPA.

Financial assets held in foreign currencies are subject to re-evaluation effect based on closing exchange rates. The re-evaluation of assets has a P&L effect, which is offset by re-evaluation of liabilities (balance sheet effect).

The fair value of the financial assets is determined by the external asset manager of the Company, obtained directly from market data.

F. Share of reinsurers in the technical reserves

The method for assessing the ceded technical reserves follows the same principles as those of the technical reserves described in paragraph D.2. At 31 December 2022 the ceded technical reserves came to 2 142 KSEK.

G. Receivables from insurance and reinsurance transactions

These receivables have a contractual maturity of less than one year. They are assessed at their notional value, possibly corrected by a provision to take into account the credit quality specific to each counterparty.

At 31 December 2022, the receivables from reinsurance transactions mainly correspond to the current accounts of reinsurers.

D.2 Technical provisions

D.2.a Summary of technical provisions by line of business

in KSEK	2022			2021		
	BEL	RM	Total	BEL	RM	Total
Total health (similar to non-life)	-	-	-	-	-	-
Income protection insurance	-	-	-	-	-	-
Total Life (excluding health)	22 918	4 716	27 635	35 680	5 046	40 725
Other life insurance	22 918	4 716	27 635	35 680	5 046	40 725
Total	22 918	4 716	27 635	35 680	5 046	40 725

The BEL gross of recoverable on December 31, 2022 decreased by 35% compared to December 31, 2021. The decrease of BEL mainly results from the increase of profitable contracts.

D.2.b Principles and assumptions for valuing the technical provisions

Technical provisions are valued in accordance with Article 77 of the Solvency II Directive which states that the value of technical provisions shall be equal to the sum of a best estimate and a risk margin.

Best Estimate of Liabilities is assessed as the probability-weighted average of all future cash-flows arising from the existing valued contracts, taking account of the time value of money (expected present value of future cash-flows), using the relevant risk-free interest rate term structure.

Insurance obligations are segmented by product, sub-product and risk-categories to define homogeneous risk groups. The granularity is derived from existing local reporting and from the company specific accounting and Head Office reporting processes.

The cash-flow projection used in the calculation of the best estimate takes into account of all the cash in- and out-flows required to settle the insurance and reinsurance obligations over the lifetime thereof. The calculation is based upon up-to-date and credible information and realistic assumptions and is performed using adequate, applicable and relevant actuarial and statistical methods.

The Risk Margin is assessed as the cost of providing an amount of eligible own funds equal to the Solvency Capital Requirement necessary to support the insurance obligations over the lifetime thereof.

The cost-of-capital rate which is prescribed by EIOPA is applied to the run-off of SCR from the valuation date to extinction of all insurance obligations and discounted at the risk-free rate.

The risk margin is calculated using the 'method 2' of the simplifications proposed in Guideline 61 of the Guidelines on the valuation of technical provisions (EIOPA-BoS-14/166). This methodology is based on the projection of the risk sub-modules in proportion to certain indicators called 'drivers'.

D.2.c Level of uncertainty related to the value of technical provisions

The main factors of uncertainty identified in the technical reserves are:

- their transposition into a risk neutral environment without real-world assumptions (target policyholder benefit rate, assets dividend rate, etc.);
- the Best Estimate projected costs, in particular for rapid development or run-off portfolios.

D.2.d Reinsurance recoverables

The reinsurance program aimed at reducing underwriting risk, in particular the following risks: Peak risk (related to exposure to risk on a single head or risk) and Catastrophe risk (linked to exposure to risk over a single event - concentration risk).

D.3 Other liabilities

<i>In KSEK, at December 31, 2022</i>	<i>Reference</i>	Balance sheet solvency 2	Annual financial report
Technical provisions incl. Best estimate of liabilities (BEL)		-	-
Provisions for pensions and other benefits	A	27 635	67 005
Liabilities for cash deposits of reinsurers	B	- 15	-
Deferred tax liabilities	C	8 212	-
Financial liabilities other than debts owed to credit institutions	D	-	-
Insurance & intermediaries payables	E	-	-
Reinsurance payables	E	4 032	-
Other debts (Not linked to insurance)		6 209	10 109
Subordinated liabilities in Basic Own Funds	F	-	-
Any other debts, not elsewhere shown		22 286	22 796
Other liabilities		68 359	99 910
Ordinary share capital, Premiums		93 300	93 300
Reconciliation reserve		32 220	8 311
Dividends		-	-
Own funds		125 520	101 611
Total Liabilities		193 879	201 521

Notes A to F refer to the methods for valuing other liabilities described below when considered as significant.

Reconciliation with the financial statements and methods for evaluating other liabilities:

<i>In KSEK</i>	<i>Reference</i>	December 31, 2022
Fair value financial assets	C	-
Valuation of insurance liabilities under Solvency II and elimination of deferred acquisition costs	C	- 9 768
Revaluation of subordinated liabilities	F	-
Others	B, C, D et E	2 127
Assets and deferred tax liabilities compensation	C	-
TOTAL OF RESTATEMENTS		- 7 642

Other liabilities are valued "at the amount for which they could be exchanged between knowledgeable and willing parties in an arms-length transaction".

B. Deposits from reinsurers

At 31 December 2022, the line item "Deposits from reinsurers" for an amount of 15 KSEK mainly corresponds to the cash deposits of the Company.

C. Deferred tax liabilities

Deferred tax liabilities are tax liabilities. They are determined in accordance with the method described in paragraph D.5., Other information.

E. Liabilities from reinsurance transactions

These liabilities have a contractual maturity of less than one year. In principle, they are valued at notional value.

D.4 Alternative methods for valuation

The Company does not use any alternative methods for valuation.

D.5 Any other information

The Company uses the risk-free interest rate curve provided by EIOPA without Volatility Adjustment.

Deferred taxes

Deferred taxes are calculated on the basis of the temporary differences between the carrying amount of assets and liabilities in the Solvency II balance sheet and their tax base.

Tax credits and tax loss carry-forwards are recognized and assessed in compliance with IFRS standards. Deferred tax assets and liabilities are measured using the liability method, using the tax rate which is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been or will have been enacted before the balance sheet closing date of that period. They are not discounted.

Deferred tax assets are recognized in the balance sheet if it can be shown that they can be absorbed by future taxable profits within a reasonable period.

Deferred tax assets and deferred tax liabilities may be offset if, and only if:

- they relate to the taxes deducted by the same tax authority and from the same taxable entity;
- there is a legally enforceable right to offset the payable tax assets with the payable tax liability.

The Company calculates its deferred tax on the basis of the local tax required and according to the principles described above. The position of deferred tax in the Solvency II balance sheet is offset by each entity.

At 31 December 2022, deferred tax liabilities were 8 212 KSEK.

E. Capital Management

E.1 Own funds

E.1.a Objectives and policy for own funds management to cover the SCR/MCR

The objective for the Company's capital management is to ensure an optimized and sufficient capital structure, to satisfy prudential requirements and to guarantee adequate financial resilience.

The Company's Capital Management Policy aim at setting the boundaries for the wished level of coverage for the SCR. The available capital will be set accordingly and management actions will be defined for situations out of the boundaries.

The primary objectives of the policy are, on the one hand, to ensure that BNPPCL maintain capital ratios that protect its viability in the long term interest of the policyholder and thus comply with externally imposed capital requirements and, on the other hand, to use capital effectively in the interest of its shareholder.

The target capital will be based on the risk appetite of the company and thus take into account the expected volatility of the solvency ratios (the available versus the required capital) and the exposure to stress scenarios in the ORSA.

The Company's Capital Management Policy is based on the following principles:

- ensuring a level of capital so that, 90% of the SCR absorbed, it will still be sufficient to cover the MCR
- covering greater than 100% of the SCR defined within the scope of the ORSA assessment
- being adequate for Local Capital Requirement based on regulator coverage target (until defined by local regulator assumed to be 100% SCR).

Depending on the levels of solvency ratios observed on a quarterly basis and the forecasts made under ORSA and yearly updates if necessary, remedial actions to adjust the capital may be initiated.

E.1.b Structure, amount and quality of own funds

Available own funds were 125 520 KSEK at 31 December 2022 and comprised the following elements:

<i>In KSEK</i>	December 31, 2022
Ordinary share capital	38 000
Share premiums	55 300
Reconciliation reserve	32 220
Subordinated liabilities	-
Guarantee funds	-
TOTAL	125 520

Own fund items are ranked at three tiers with a graduation in quality, according to their availability, their priority subordination for hedging policyholder undertakings, and their duration.

The composition by Tier is as follows:

In KSEK, at	December 31, 2022					December 31, 2021
	Total	Tier 1 - unrestricted	Tier 1 - restricted	Tier 2	Tier 3	
Basic own funds before deduction for participations in other financial sector as foreseen in article 68 of Delegated Regulation 2015/35						
Ordinary share capital (gross of own shares)	38 000	38 000	-	-	-	38 000
Share premium account related to ordinary share capital	55 300	55 300	-	-	-	55 300
Surplus funds	-	-	-	-	-	-
Preference shares	-	-	-	-	-	-
Share premium account related to preference shares	-	-	-	-	-	-
Reconciliation reserve	32 220	32 220	-	-	-	6 643
Subordinated liabilities	-	-	-	-	-	-
An amount equal to the value of net deferred tax assets	-	-	-	-	-	-
Other own fund items approved by the supervisory authority as basic own funds not specified above	-	-	-	-	-	-
Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds						
Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds	-	-	-	-	-	-
Deductions not included in the reconciliation reserve						
Deductions for participations in financial and credit institutions	-	-	-	-	-	-
Total basic own funds after deductions	125 520	125 520	-	-	-	99 943

The reconciliation reserve is broken down as follows:

In KSEK	December 31, 2022	December 31, 2021
Non restricted equity	8 311	887
Solvency II restatements	23 872	7 530
Impact on future profits net of taxes	23 398	7 056
Other restatements	474	474
Planned distribution	-	-
TOTAL RECONCILIATION RESERVE	32 183	6 643

None of the Company's own funds are subject to transitional arrangements and the Company has no ancillary own funds as at 31 December 2022 (2021, 0 KSEK).

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.a Amounts of SCR and MCR

The amount of the Solvency Capital Requirement and Minimum Capital Requirement at 31 December, 2022 are SEK 51.4 million and SEK 39.7 million respectively.

E.2.b Amount of SCR per risk module

in KSEK

SCR per risk module in K SEK, at	2022	2021
Market risk	9 005	7 935
Counterparty default risk	855	1 113
Life underwriting risk	44 447	42 796
Health underwriting risk	0	0
Non-life underwriting risk	0	0
Diversification	-6 554	-6 087
Intangible asset risk	0	0
Basic Solvency Capital Requirement	47 753	45 757

Operational risk	11 942	9 523
Loss-absorbing capacity of technical provisions	0	0
Loss-absorbing capacity of deferred taxes	-8 212	-3 156
Solvency Capital Requirement	51 483	52 123

E.2.c Information on the data used for calculating the MCR

The data used for calculating the MCR is:

- the technical reserves described in paragraph D.2;
- the amounts of the net reinsurance premiums issued for financial year 2022;
- capital at risk under Solvency I.

in KSEK

Overall MCR calculation in KSEK	2022	2021
Linear MCR	71 402	67 751
SCR	51 483	52 123
MCR cap	23 167	23 455
MCR floor	12 871	13 031
Combined MCR	23 167	23 455
Absolute floor of the MCR	43 604	36 766
Minimum Capital Requirement	43 604	36 766

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

The Company does not apply this.

E.4 Differences between the standard formula and any internal model used

The Company does not use any internal model.

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

There was no breach of the Solvency Capital Requirement (and hence the Minimum Capital Requirement) over the reporting period.

E.6 Any other information

No other specific information.

APPENDICES – QUANTITATIVE TEMPLATES DISCLOSURES

- The following appendix gives the quantitative templates available for public disclosure.
- They are reported in SEK.
- For presentation purposes the empty LoB are not presented
- The following templates are not relevant for the situation of the Company and therefore, not attached:
